Due to Stephanie by next Wednesday

> **If you have not done so yet – create an account for yourself on www.github.com (name should be professional)**
> **Create your capstone repo (in a new folder) and add a docs folder.**
> **Create a docs folder, add documentation in the form of markdown, images or PDFs.**
> **Update your README.md file to link to your new project documentation.**
> **Your documentation should include...**
> **Definition of your audience**
> **Definition statement (I want to create a web application that...) for your project**
> **High level story (elevator pitch)**
> **Outline of the content**
> **User Flow**
> **Wireframes (1 wireframe per page minimum, hand-drawn is ok!)**

Virtual Fundraising Tools:

Audience: Individuals, business, and organizations needing to host online fundraising and want to use the tools provided by the website for their fundraising or games.

Project Statement: I will create a website about how to host an online/virtual fundraiser.

Elevator Pitch: Hello, I am Jennifer Bagwell and my site can make it easier or help you raise money online. My site will have information and resources to make your online fundraiser simple and a success.
